Abstracts

CAD-CAM technology is the culmination of decades of contributions by many in the name of manufacturing automation. It is the vision of innovators and inventors, mathematicians and machinists alike, all striving to shape the future and drive manufacturing with technology. The term “CAD-CAM” is generally used to describe the software that is used for design and machining or manufacturing with a CNC Machine. CAD is an acronym for Computer Aided Design and CAM is an acronym for Computer Aided Manufacturing. CAD software is used to create things by designing and drawing, using geometric shapes to construct a model. However, not all manufactured parts have to be designed as a solid 3D model.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the CAM & CAD Software market in 2020.
