Abstracts

Ceramic materials are inorganic and non-metallic solids. Ceramic packaging materials are characterized by high hardness, high temperature resistance, water resistance, chemical resistance and pressure resistance. They have low temperatures and low electrical conductivity. They also have abrasion resistance. Ceramics are made from natural materials such as quartz, kaolinite and clay. Ceramic is the preferred packaging because of its visual appeal and elegance. But it is difficult to pack because of its hard surface. In addition, the production of ceramic materials in the release of harmful gases, limiting the growth of ceramic packaging materials market.
