Abstracts

Circular polarized antennas play an important role in the radio field. Especially in the space vehicles, due to the fixed position and attitude of the aircraft, their communication measurement and control equipment are required to be conformal, light weight, small size and low cost circular polarization antenna. The circular polarized microstrip antenna is an ideal one to meet these requirements.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
