## **Abstracts**

This report focus on Climate Control Seat (CCS) market.

Climate Control Seat (CCS) integrates the Climate Control Seat (CCS) system which provides cooling and heating to seat occupants, as desired, through an active, microprocessor-based temperature management system.

Climate controlled seats are available in many forms. Designed for air flow, these seats often come with built-in heating and cooling for the seat and backrest. Climate systems are often complemented by integrated ventilation. Heated truck seats keep you warm in the winter, no matter what kind of weather you drive through, while cooling helps keep your body at a comfortable temperature in the summer.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
