## **Abstracts**

Today's clinical trial supply management solutions are very few. They come with planning & forecasting characteristics, packaging & randomization management, distribution, clinical batch management & country approvals, and analytics. However, a partially pre-configured solution, hosted on a cloud, adds much more than the typical CTSM solutions to the value proposition for smaller but critical entities like CROs. Add to that the wide array of robust Infosys implementation services such as business care preparation, scoping, and business blueprinting.
