## Abstracts

Cloud hosting is where your site is stored on multiple servers, which lets you pull resources from a variety of different places. This makes cloud hosting a very scalable, reliable, and flexible type of hosting, perfect for sites that experience hikes and dips in things like traffic. Note that there are different types of cloud hosting. Traditional web hosts, such as DreamHost and HostGator, offer cloud hosting packages that are priced similarly as their other web hosting packages (typically in the Shared or VPS range). These small business-friendly cloud hosting solutions are what we're primarily focused on in this roundup.

Cloud hosting is great for anyone who needs flexibility. Think of your plan like a pay-as-you-go mobile: you decide your own resource limits each month, and pay accordingly. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Cloud Hosting Service market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Cloud Hosting Service industry.

Based on our recent survey, we have several different scenarios about the Cloud

Hosting Service YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ xx million in 2019. The market size of Cloud Hosting Service will reach xx in 2026, with a CAGR of xx% from 2020 to 2026.

With industry-standard accuracy in analysis and high data integrity, the report makes a brilliant attempt to unveil key opportunities available in the global Cloud Hosting Service market to help players in achieving a strong market position. Buyers of the report can access verified and reliable market forecasts, including those for the overall size of the global Cloud Hosting Service market in terms of revenue.

Players, stakeholders, and other participants in the global Cloud Hosting Service market will be able to gain the upper hand as they use the report as a powerful resource. For this version of the report, the segmental analysis focuses on revenue and forecast by each application segment in terms of revenue and forecast by each type segment in terms of revenue for the period 2015-2026.
