The coal crusher is called the coal pulverizer for short, is one of the common equipment in the production line of crushing coal and crushing gangue. The coal pulverizer mainly aims at the coal preparation plant brick factory and so on pulverizes the coal to use the special-purpose model. The utility model solves the problem that the material is easy to be blocked up because of the high moisture content of the material. Because the coal crusher is designed to have no screen bottom and screen Mesh, so even if the material moisture point in the big, will not plug, even if it rains can be normal production. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
