Cocamidopropyl Hydroxysultaine is a new mild amphoteric surfactant. Compared with alkyl and propyl carboxyl betaine, Cocamidopropyl Hydroxysultaine has more advantages: chloroacetic acid impurities, low content of inorganic salts, less irritation. Cocamidopropyl Hydroxysultaine has strong resistance to hard water and is more resistant to calcium soap deposition. Cocamidopropyl Hydroxysultaine can be widely compatible with cationic, anionic, non-ionic surfactants, and other surfactants, has a good synergistic effect, can reduce the irritation of traditional surfactants. Cocamidopropyl Hydroxysultaine can improve foaming power tenderly and produce fine, stable and rich foam. Cocamidopropyl Hydroxysultaine also has high thickening performance, good salt tolerance, will not cause deterioration, thinning and stratification due to low temperature. Cocamidopropyl Hydroxysultaine is often used in shampoos, foam bath lotion, facial cleansers, personal hygiene products and baby washing products.
