Computer network adapter is also called a 'network interface card' (NIC), a network adapter is a plug-in card that enables a computer to transmit and receive data on a local network. A network adapter also allows an electronic device, like a computer or laptop, to interface with a local computer network. They can work with wired connections, like those including an Ethernet cable; wireless ones, which use routers; or both.
Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Computer Network Adapters market in 2020.
COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
This report also analyses the impact of Coronavirus COVID-19 on the Computer Network Adapters industry.
