## **Abstracts**

Contract lifecycle management (CLM) software helps to organize the meticulous and complex contractual negotiation process between buyers and suppliers. These apps typically manage the entire contract lifecycle, from initial request for proposal (RFP) to later re-negotiations. Users can get full control of the contractual procedure which minimizes supplier risk, and also helps them obtain deep insight into contracts, which creates more negotiation opportunities and boosts cash flow.

CLM software systems range from applications that exclusively manage vendor contracts to robust suites that include bidding, sourcing, and procurement features. These solutions can seamlessly integrate with enterprise resourcing planning (ERP), supply chain, and accounting systems.
