A crossbow utilizes a horizontal bow mounted onto a gun-like stock. Although it might seem as though someone decided to combine a bow with a gun to create the crossbow, the fact is that crossbows were around far before guns were even invented. Arrows shot by a crossbow are also known as bolts or quarrels. Crossbows were invented in ancient China as military weapons, and the innovation of these devices was a game-changer in the field of projectile weaponry.

Today, crossbows are mainly used in shooting sports and hunting, especially when silence is of the utmost importance.
