Cuprous Iodide, also known as copper iodide is an inorganic chemical compound. Its chemical formula is CuI and its melting point is 606°C , it has a wide variety of applications which include cloud seeding, dietary supplement and organic synthesis. The colour of samples of copper iodide is usually even or tan, and reddish brown when found naturally in Marshite minerals. Copper iodide is used as a dietary supplement as a component in animal food supplements and also for iodisation of table salt. It is also used to detect mercury as it changes its colour to brown when in contact with mercury. Copper iodide is used in cloud seeding and also for the stabilization of heat in nylon.
