Data Center Accelerator Card improves the overall performance of your computer. This helps increase consumer-driven data demand and increase the use of Al-based services to drive demand for Al-centric data centers. Data center accelerators greatly improve data center performance. In addition, data center accelerators and general-purpose processors consume less power due to resource sharing with the main processor.

Data accelerators provide high-performance, easy-to-use data compression through advanced compression architectures, proven compression techniques, and CUA-compliant user interfaces.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
