## Abstracts

DAC cables, or “Direct Attach Cables”, are a form of shielded high speed cable with SFP connectors on either end. They can be used to connect switches to routers and/or servers.

The increasing demand for next-generation high speed pluggable-products is boosting the growth of the market over the forecast period. However, the high costs associated with the set-up of optical cable networks, as well as the expensive raw materials used in the manufacture of optical cables, for instance, silica and plastic, are additional factors that hinder the growth of the market.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
