## Abstracts

Vaping is the inhaling of a vapor created by an electronic cigarette (e-cigarette) or other vaping device. E-cigarettes are battery-powered smoking devices. They have cartridges filled with a liquid that usually contains nicotine, flavorings, and chemicals. The liquid is heated into a vapor, which the person inhales. That's why using e-cigarettes is called 'vaping.'

Growing concerns over the health risks associated with conventional tobacco cigarettes are expected to prompt adult smokers to switch to e-cigarettes, thereby driving product demand.
