## Abstracts

The Early Entry Saw was designed for cutting control joints in green concrete, but it can also be used for joint clean-out applications. This saw can be used indoors, on small jobs, or for finishing cuts near walls. The saw's skid plate prevents concrete from unraveling when new joints are being cut. The saw's up-cut rotation allows use with a dust collection system for a clean, dust-free work environment. Its polyurethane wheels allow the unit to cut accurately and straight in many working conditions.
