## Abstracts

A supercar — also called exotic car — is a loosely defined description of certain high-performance street-legal sportscars. Since the 1990s or 2000s, the term hypercar has come into use for the highest performing supercars.

Many recent hypercars use electric or hybrid drivetrain, a trend started in 2013 by the McLaren P1, Porsche 918 Spyder and LaFerrari.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Electric Supercar market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
