Abstracts

Employee engagement platform helps organizations solicit and track feedback from their employees, recognize employee achievements, and promote positive activity. Employee engagement tools are used to draw actionable insights from employee feedback. Organizations use employee engagement software to understand employee sentiment, promote company-wide recognition of employee success, and to promote positive activities that benefit the health or wellness of the organization or its employees.

Employee engagement platform is most commonly implemented in HR departments as either a supplemental tool or direct replacement for the traditional performance review process. Employee engagement tools solicit employee feedback through pulse surveys, which are succinct surveys sent to employees at regular intervals with a curated list of questions designed to accurately evaluate employee engagement and the employee experience.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Employee Engagement Platform market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
