## Abstracts

Enterprise app stores allow companies to build and maintain an internal app marketplace. Companies use enterprise app stores as a way to consolidate all possible business applications in one place, letting employees use both company-provided and BYO devices to access the applications they need. A company's internal service desk or asset team would be most likely to use enterprise app stores, since they curate the software employees use or have access to. Enterprise app stores are often used in conjunction with mobile application management software and mobile device management software as part of the greater management ecosystem for a company's mobile phones and tablets.
