Abstracts

Ethylcyclohexane is an organic compound with the molecular formula C_8H_{16} . It is a colorless liquid under normal temperature and pressure, insoluble in water, with stimulating and anaesthetic effect, flammable, its vapor and air can form explosive mixture. Often used as chemical intermediates, gas chromatography contrast samples, used in organic synthesis.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Ethylcyclohexane market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Ethylcyclohexane industry.
