Abstracts

Fluoropolymer coatings are blends of high-performance resins and fluoropolymer lubricants. These coatings contain a superior dry film lubricant. The final product produces a smooth, hard, slick coating that provides excellent corrosion and chemical resistance. FEVE resins (fluoropolymer based) have a higher gloss and color range. It is the broader range of gloss that allows for FEVE coatings to produce a brighter color palette and retention than its PVDF opposition.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
