Flocculation Plant , also called coagulation pond, is the pond where the wastewater completes the flocculation process. Generally, the pond behind the flocculation pond must be the sedimentation pond. Sometimes, the flocculation pond and the sedimentation pond are not separated and are called flocculation sedimentation pond. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Flocculation Plants market in 2020.
