## Abstracts

Full grain leather comes from the top layer of the hide. It includes all the grain with it – hence the name full grain leather. This type of leather retains the inherent toughness, as well as the imperfections because there are no surface alterations or splitting. It is the highest quality leather and the only one suitable for saddleback. Thus, it is also the most expensive. Working with this leather material is challenging. It absorbs body oils and develops a patina over time – a characteristic that attributes to its popularity.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Full Grain Leather market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
