## **Abstracts**

A FES device consists of a control box, about the size of a pack of cards, with a battery and electrodes. For foot drop, the device is usually worn in a cuff below the knee. This is where the electrodes can stimulate the nerve that goes to the muscle that would normally lift the front of your foot.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
