Plant and process operators need a reliable, simple means of confirming the quality or mixture of process gases. The means used to perform these tests must be reliable, accurate, and very affordable. For many processes and situations, gas quality can be easily inferred through a simple analysis of the gas mixture's specific gravity as opposed to a complex spectral analysis.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Gas Gravitometers market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
