Abstracts

Gasket & sealing materials are available in rods, plates, tubes, balls & parts. Gaskets and seals are an essential part of any engine repair. They prevent leakage of gases, coolant, and fuel and are discarded after a single-use. They are replaced each time fluids and gases are removed from engines.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
