Abstracts

This report focus on Glass Movable Walls market. Movable walls (also referred to as unitized walls) are built completely off-site at the manufacturer's facility. This lends itself to better quality control and a more uniform wall product. There are some main parts that need to be installed on-site: ceiling and floor channels to hold the walls in place; the actual wall panels and doors; trim and finishing; and power and data components. This allows the movable walls to be installed and relocated very quickly.

The diversity of building materials and environmental safety requirements are the main drivers of the glass movable walls market.
