Stand bags feature a design that's unique compared to other styles of golf bag—they have two retractable legs.

These legs allow the bag to stand either completely upright (like a staff or cart bag) or else it can stand canted, where its two legs extend out to stabilize the bag while allowing for easy access to any club. When the bag is upright, the legs retract and lay snug against the bag.

Golfers prefer stand bags when they are walking on the course. That's because the retractable legs allow the bag to remain upright on turf, whereas cart or staff bags are designed to be used on flat surfaces, such as the back of a riding cart. But if you walk the course, there's no need for your clubs to stay on the cart path when you're teeing off or lining up a putt.

Many stand bags come equipped with backpack-style shoulder straps that distribute the weight across both shoulders. Stand bags weigh about 5 pounds or lighter. Some even have additional ergonomic features, such as a hip pad to prevent the bag from rubbing you the wrong way as you walk.

It also should be noted that stand bags can be used with push/pull carts or strapped to the back of a riding cart. But you should take particular care when doing so, especially with push or pull carts, to make sure the legs don't get damaged in trying to secure it with straps.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Golf Stand Bag market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its
