Abstracts

Hadoop is an open source project and several vendors have stepped in to develop their own distributions on top of Hadoop framework to make it enterprise ready. The beauty of Hadoop distributions lies in the fact that they can be personalized with different feature sets to meet the requirements of different classes of users.

Hadoop Distributions pull together all the enhancement projects present in the Apache repository and present them as a unified product so that organizations don't have to spend time on assembling these elements into a single functional component.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Hadoop Distributions market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
