Abstracts

This report focus on Home Exchange Service market.

Home exchange, also known as house swapping, is a form of lodging in which two parties agree to offer each other homestays for a set period of time. Since no monetary exchange takes place, it is a form of barter, collaborative consumption, and sharing. Home exchange can cover any type of residence including apartments, houses, holiday cottages, boats, or recreational vehicles. It can include an exchange of the entire home or just a room. The length of the swap can vary from a weekend to over a year. The swap can be simultaneous or non simultaneous. Home exchanges are usually arranged via specific types of hospitality services and social networking services, most of which charge a fee.

Like all homestays, home exchanges offer several advantages over hotel lodging, including a lower cost and opportunities for cultural diplomacy and friendship. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Home Exchange Service market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Home Exchange

Service industry.
