Abstracts

Hydrogenated hydrocarbon resin is a thermoplastic hydrocarbon resin produced by hydrogenation and refinement of the dicyclopentadiene, which does not contain volatile gas, and has good tackifying properties, compatibility, thermal stability, and light stability and can improve the adhesive bonding properties and other advantages. The product is mainly used for producing self-adhesive, hot melt adhesive, pressure-sensitive adhesive, and rubber-type adhesive products, in particular, it is widely used in sanitary products, medical care products, and indoor floor adhesives.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
