Abstracts

A laminate trimmer (or trimming router) is a small version of a wood router, normally used to trim laminate such as Formica. It generally has a 1/4-inch collet. Typical laminate trimmers spin their bits at up to 30,000 RPM. Some models provide variable speed control. Laminate trimmers evolved, as their name suggests, as a specialized tool for that particular trade. Laminate trimmers excel at this task due to their light weight and one-handed operation.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Laminate Trimmer market in 2020.
