Abstracts

Location-based marketing (LMS) is a direct marketing strategy that uses a mobile device's location to alert the device's owner about an offering from a near-by business. Typically, location-based alerts are delivered to smartphones through SMS text messages. An alert may include information about a local business' deal of the day or include a purchasing incentive, such as a discount coupon code.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Location Based Marketing market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
