## Abstracts

The managed M2M service market enables connectivity, compute and decision services that are necessary for connected solutions. Managed M2M services are a solution element within the broader solution sets of IoT, digital business and operational technology (OT) systems in industrial environments. Managed M2M services enable businesses to collect, analyze and interact with data streams, thus providing businesses with the ability to monitor, manage and control (manually and through automation) assets associated with business processes. Managed M2M services may encompass integrated and managed IT infrastructure and systems, OT infrastructure and systems, software, network services (connectivity), and IT services. This market focuses primarily on connectivity and a continuum of related value-added services, such as consulting, M2M device engineering, M2M application development and integration, related middleware aggregation, application hosting, and related system management.
Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Managed M2M Services market in 2020.
COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
This report also analyses the impact of Coronavirus COVID-19 on the Managed M2M
