## Abstracts

Marine and boat ventilation systems are of great importance. The purpose of high-quality marine ventilation is twofold: it contributes to the maintenance of a vessel by reducing the growth of mold and removing musty air and it benefits the comfort level on board as well. Marine ventilation is a necessity for the performance of engines and other equipment. Ventilation systems both move the air and equalize humidity levels inside and outside the boat.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
