## Abstracts

Microchannel plate detectors are intended for the registration of corpuscular and electromagnetic radiation in scientific or industrial applications. The offered MCP detectors consist of one to three stacked MCPs, metal-ceramic fittings and metal anode based detector. The operating principle is based on the charged particles input current registration and further amplification.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
