Mineral Insulated Metal Sheathed Cables or MIMS cables for short, also known as mineral insulated cable is a type of bendable metal cable used in temperature sensor manufacture. Mineral insulated cable is made from a seamless metal tube, tightly packed with Magnesium Oxide powder. Thermocouple wires run through the metal tube and the magnesium oxide powder helps keep these wires insulated and separated. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
