## Abstracts

Mineral Insulated Thermocouples are manufactured from mineral oxide insulated metal sheathed cable. Mineral Insulated Cable consists of thermocouple wire insulated by compacted magnesium oxide surrounded by a metal sheath. Mineral insulated thermocouples are used for various measuring tasks. For process adaptation, they are inserted, clamped-on, welded on the surfaces or attached by other means.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
