## Abstracts

The MTD solution market consists of solutions that protect organizations from threats on iOS and Android devices. MTD solutions provide protection by preventing, detecting and remediating attacks. Different MTD solutions employ different techniques. In general, MTD solutions collect and analyze indicators of compromise to identify anomalous behavior and counter threats. To do so, MTD solutions gather threat intelligence from the devices they support as well as from external sources. By observing the behavior of healthy devices and the behavior of devices under attack, MTD solutions learn to recognize malicious and suspicious behavior and intervene to remediate it.
