Module Handling Systems are commonly used for handling equipment dedicated to subsea inspection, maintenance and repair (IMR) services. The most common is by use of a Module Handling Tower installed over the vessels Moonpool. Other designs are based on A-frames or slewable towers placing the modules on pallets and skidding the modules to the dedicated positions on deck.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
