## Abstracts

This report focuses on NFC Business Card market. Embedded with an NFC chip, your Business Card will trigger a digital Action (like opening your website) when tapped against any NFC enabled device – these days, that's most smartphones and tablets. NFC is a lot like RFID, only it's a more up-close-and-personal type of wireless. Whereas RFID can be used from a distance, NFC readers work at a maximum range of about 4 inches (10 centimeters). NFC readers aren't suitable for RFID-style inventory tracking; their range is too short. So NFC Business Card can meet the needs of security and convenience.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
