## Abstracts

On-site maintenance coatings are general purpose coatings used primarily for maintaining industrial structures and for use as a top coat on a surface whose coating has been detached or ripped off. These coatings are commonly used to protect the highway and railroad structures, chemical and manufacturing plants, public utilities, and other, heavy-duty industrial facilities from deterioration by corrosion and harsh environmental conditions.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the On-site Maintenance Coatings market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
