Abstracts

The online fraud detection (OFD) market is composed of vendors that provide products or services that help an organization detect fraud that occurs over the web, mobile or other telephony channels (i.e., call center, interactive voice recognition [IVR]) by performing one or both of these functions: Running background processes that are transparent to users. Corroborating a user's identity. OFD vendors detect online fraud as transactions and interactions occur, in real time or near-real time. They provide solutions for web, mobile or telephony channels. As the sophistication of attacks continues to evolve, so too have the tools, technologies and strategies that detect and prevent fraudulent activity.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Online Fraud Detection market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
