Abstracts

Paper recycling is the environmentally friendly process of recycling paper that has already been consumed in order to make fresh, usable paper. Each day, tons of paper are consumed nationwide, and after being used for documents, writing and printing, it's usually thrown away as scrap. Unless it is recycled, paper becomes part of garbage dumps and landfills, contributing to problems like greenhouse gas emissions and pollution. Paper recycling can alleviate many of these problems by turning this scrap paper into new paper.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
