Personalization engines apply context about individual users and their circumstances to select, tailor and deliver messaging such as content, offers and other interactions through digital channels in support of three use cases — marketing, digital commerce and customer experience. These personalized interactions can increase conversion, marketing effectiveness and customer satisfaction, thereby improving business results. Personalization engines are sold as stand-alone software or can be embedded in web content management, content marketing, multichannel marketing hubs and digital commerce platforms. This market focuses only on vendors who offer personalization engines as stand-alone solutions.
