## Abstracts

Nutritional supplements for pets are products that provide a source of recognized essential nutrients, like calcium or vitamin A. They are intended to work as supplements and ensure the nutritional completeness of the diet in pets. The supplements are being marketed not only as pills/powders but also as ingredients in pet foods/gravies/snacks. The other alternative delivery formats that are gaining shares, due to the preference for pet palatability, include gels and pastes, as well as gravies and powders, designed to be added to pet food.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Pet Supplements and Nutraceuticals market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.
