Azoximer bromide, sold by the trade name Polyoxidonium, is a macromolecular compound with high-molecular weight and high immunomodulating activity. It is used in Russia and CIS in treatment and prophylaxis of diseases connected with damage of immune system. It is a N-oxidized polyethylene–piperazine derivative.

Azoximer bromide is registered in US Patent-5503830 from 1996, in the Russian Federation from 1996, under registration number 96/302/9, FS 42-3906-00.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Polyoxidonium market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Polyoxidonium industry.

Based on our recent survey, we have several different scenarios about the Polyoxidonium YoY growth rate for 2020.
