Post herpetic neuralgia is a painful condition that can occur after having shingles, a complication of chicken pox. The patch is applied after a PHN patient's skin has been pretreated with a local anesthetic or an oral analgesic.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Post Herpetic Neuralgia Patches market in 2020.
