## **Abstracts**

This report focuses on Semiconductor Refrigerators market.

Semiconductor Refrigerators (or called Solid-State Refrigerators) uses the Peltier Effect: passing a current through the junction of two different semiconductor elements (p-type and n-type) decreases the temperature at the junction, adsorbing heat from the environment. Also known as thermoelectric cooling, it operates using electricity inputs and a heat sink, but without traditional hardware associated with refrigerants and compressors.

There are several benefits to using this technology as a substitute for the traditional compressor based systems (that have been used since the 1840s): increased energy efficiency, elimination of refrigerants (in some models), noise reduction, and reduction in product size.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Semiconductor Refrigerators market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Semiconductor Refrigerators industry.

Based on our recent survey, we have several different scenarios about the Semiconductor Refrigerators YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ xx million in 2019.
