Abstracts

Shield machine and tunnel boring machine (TBM) is a machine used to excavate tunnels with a circular cross-section through a variety of soil and rock strata. They may also be used for micro tunneling. In Japan and China, the machines used for soil are called shield tunneling machines and machines used for hard rock are called tunnel boring machines. But in Europe and the USA, they are called the same name tunnel boring machine. The research we did include all of them.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
